❯ PROJECTS

Pitt Computer Science Club Website Redesign   Dec. 2020 to Current
Work-in-progress
Appointed as a club officer for the Pitt Computer Science Club, both to support initiatives and to redesign the club website. The current website can be found here: https://pittcsc.org/. Designed iteratively with Figma and developed with Gatsby, Tailwind CSS, and Framer Motion.
> **Hosted Site:** https://pittcsc-crashtestdummy.netlify.app/ > **GitHub Repo:** https://rb.gy/ds8pqt

Resu.me   Feb. 2021 to Feb. 2021
Created the frontend for a website/app that won the 2021 Steelhacks hackathon for the beginner track. Worked with three other teammates to ideate and develop the project over the course of 48 hours. The application acts as a repository for resumes and was built with React, Express, and SCSS.
> **Hosted Site:** https://shielded-chamber-18134.herokuapp.com/ > **GitHub Repo:** https://rb.gy/lg3qab

Green Pages   Dec. 2020 to Feb. 2021
Cooperated with another developer and two pharmacy students to create a website that tracks cannabis strain availability in the Pennsylvania area. Designed in Figma and developed the frontend with React and SCSS. Helped create the REST API and backend with Django Rest Framework.
> **Hosted Site:** https://green-pages-infotender.herokuapp.com/ > **GitHub Repo:** https://rb.gy/5b7sdh

Grademyaid   Sept. 2020 to Oct. 2020
Developed a website that allows students to grade and compare scores for their college financial aid packages using data from the US Department of Education. Made for Pitt CSC Hacks, a student-run hackathon. Designed in Figma and built with React, Framer Motion, and SCSS.
